# HOW TO CREATE A GABION PLANTER
Using Gabion Panels

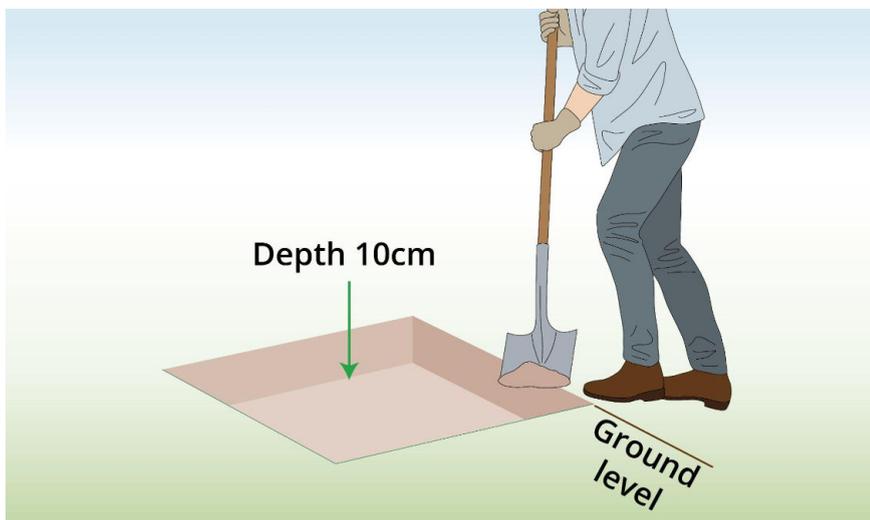

THINGS YOU'LL NEED
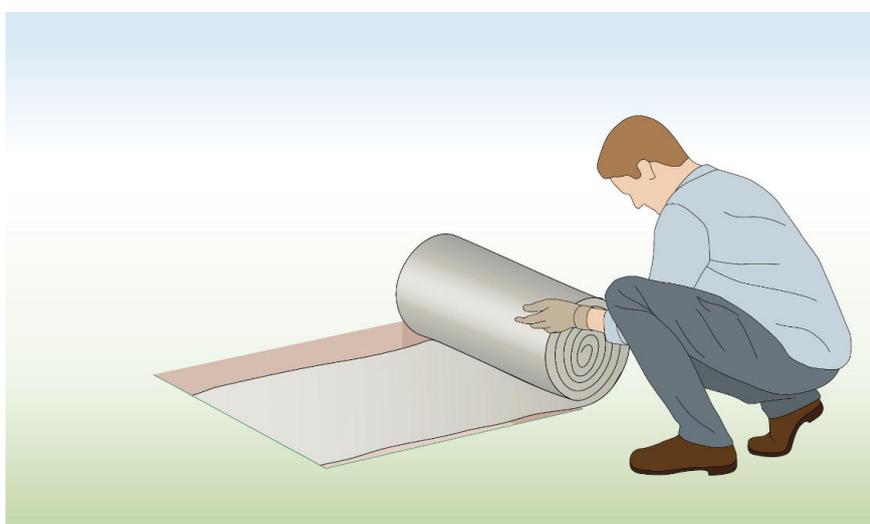

- Gabion Panels
- Geotextile
- Gabion Stone
- Helicals/Tying wire
- Shovel
- Spray Paint (optional)

Step 1: Mark Area

Measure and mark the location where you plan to construct your planter with spray paint or anything else.

Depth 10cm

Ground level

Step 2: Dig Trench

Dig 10cm or until the ground is firm.

Step 3: Lay Geotextile

Place a layer of geotextile or weed mat to prevent weeds from growing up and through your gabions.
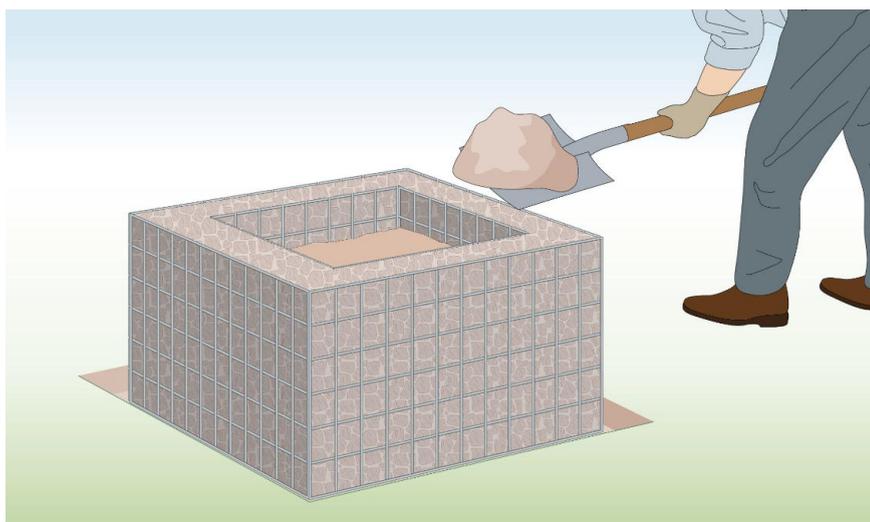

Step 4: Attach Panels

Attach the smaller panels with helicals, forming a basket - this will be your plant container.

Repeat the process to create an outer container from the larger panels.

Step 5: Fill With Stones

Fill the gap between the two baskets with your choice of stone.

Step 6: Fill Middle

Line the inside of the planter with geotextile.

Fill the middle with soil.
